

GGCS Market Update

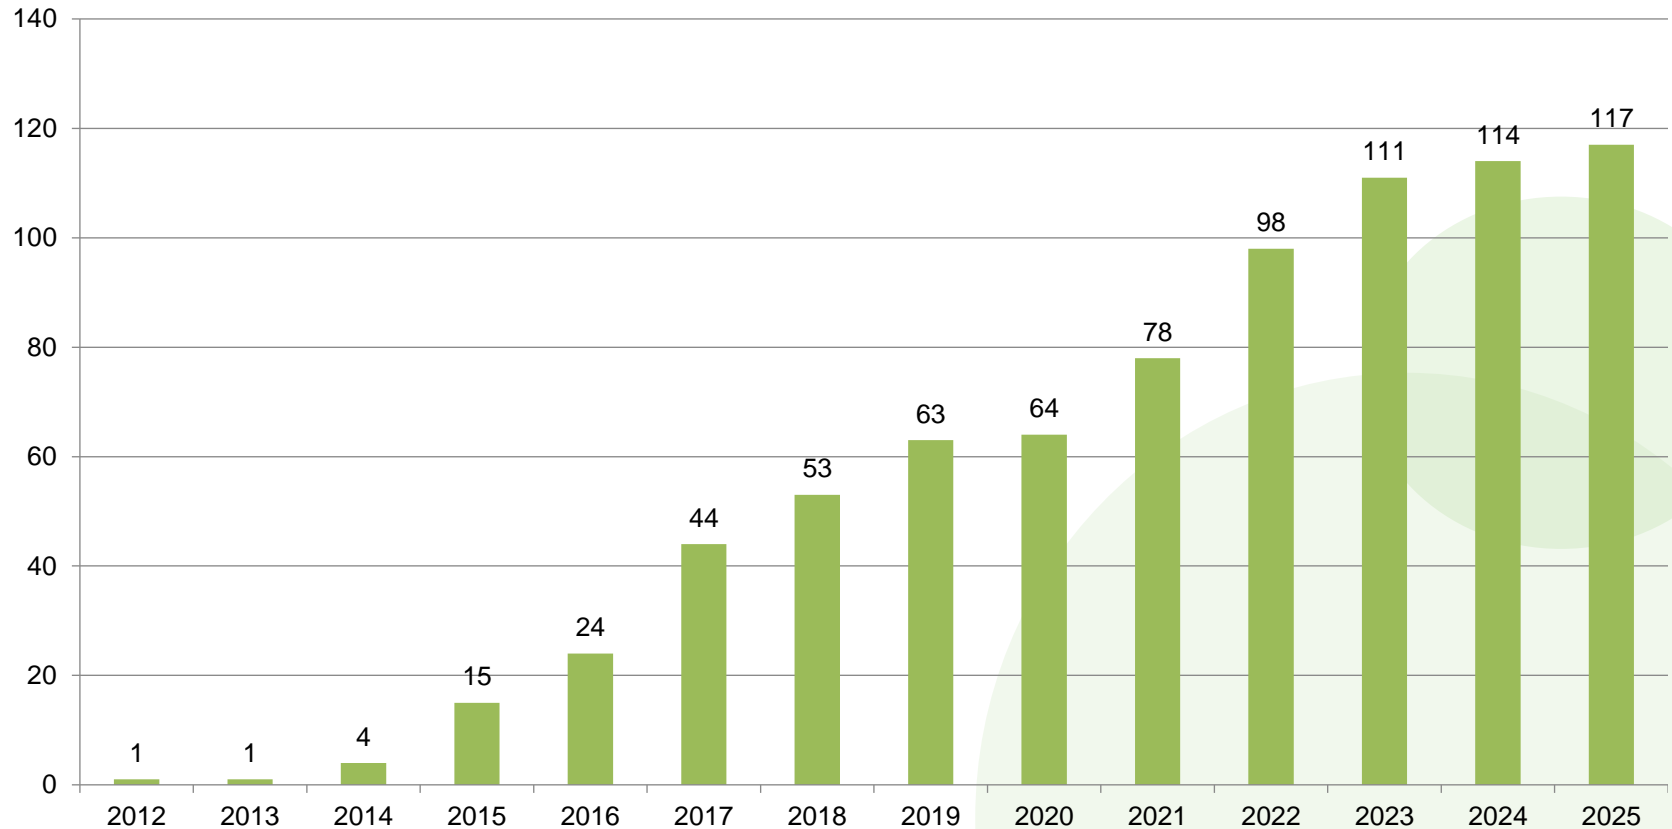

April 2025 v1.0

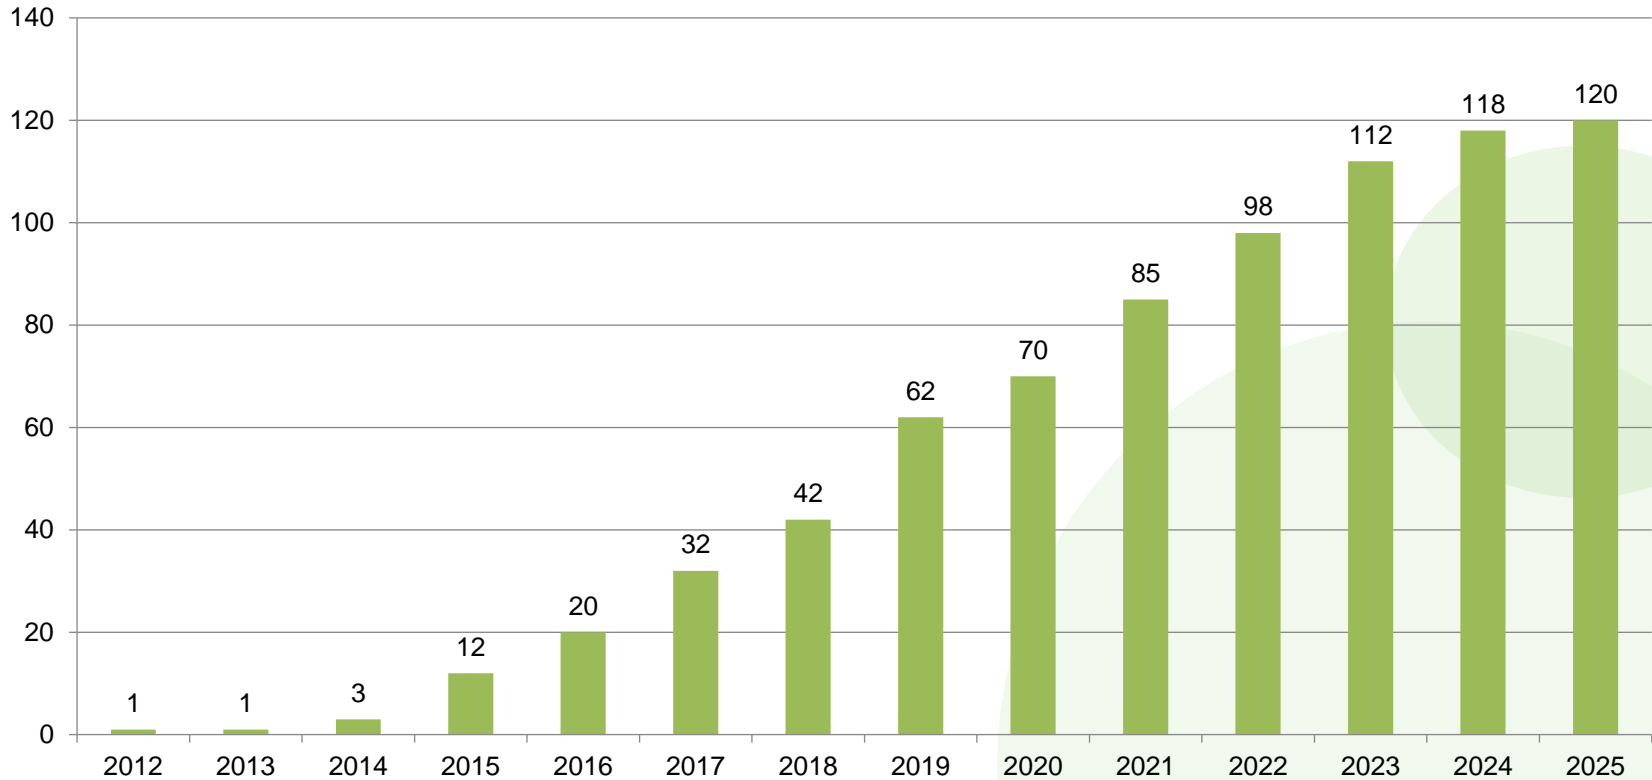

Intro

- GGCS publishes a quarterly update of activity within the Scheme.
- Data is indicative of RGGO status in the GGCS Registration Database. Exact values may vary from those stated due to minor corrections made in the Registration Database that are not reflected in the graphs presented.
- This update uses data from G-REX and there are variations of +/- 20 GWh from pre-July 2024 reports due to changes in the way withdrawals have been accounted for.
- For the underlying dataset please contact: info@greengas.org.uk

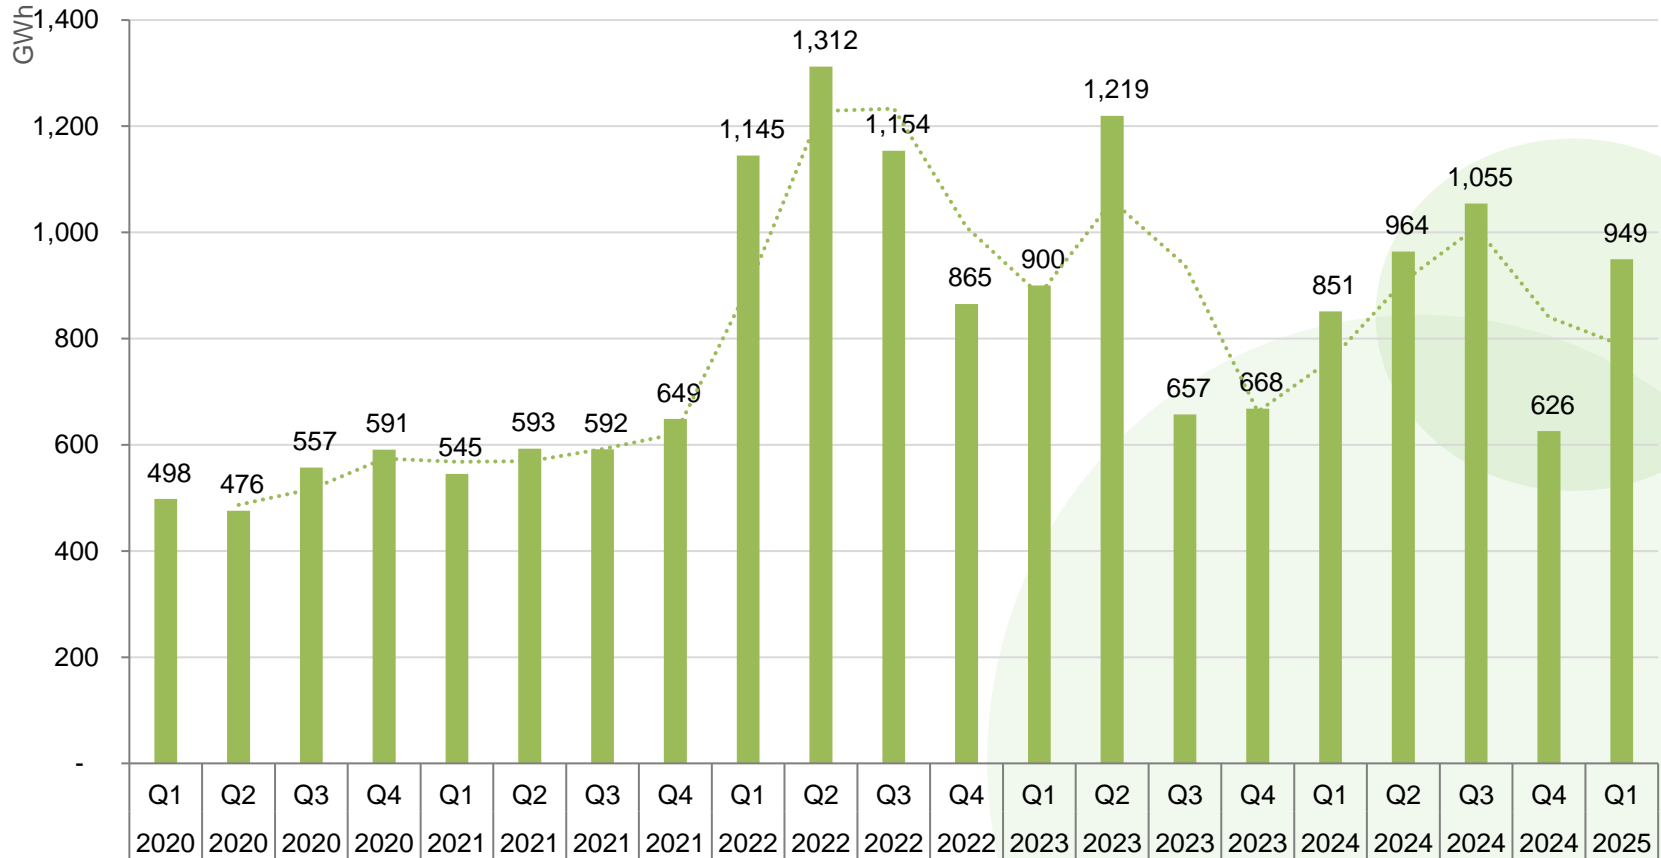

Number of GGCS Producer Accounts

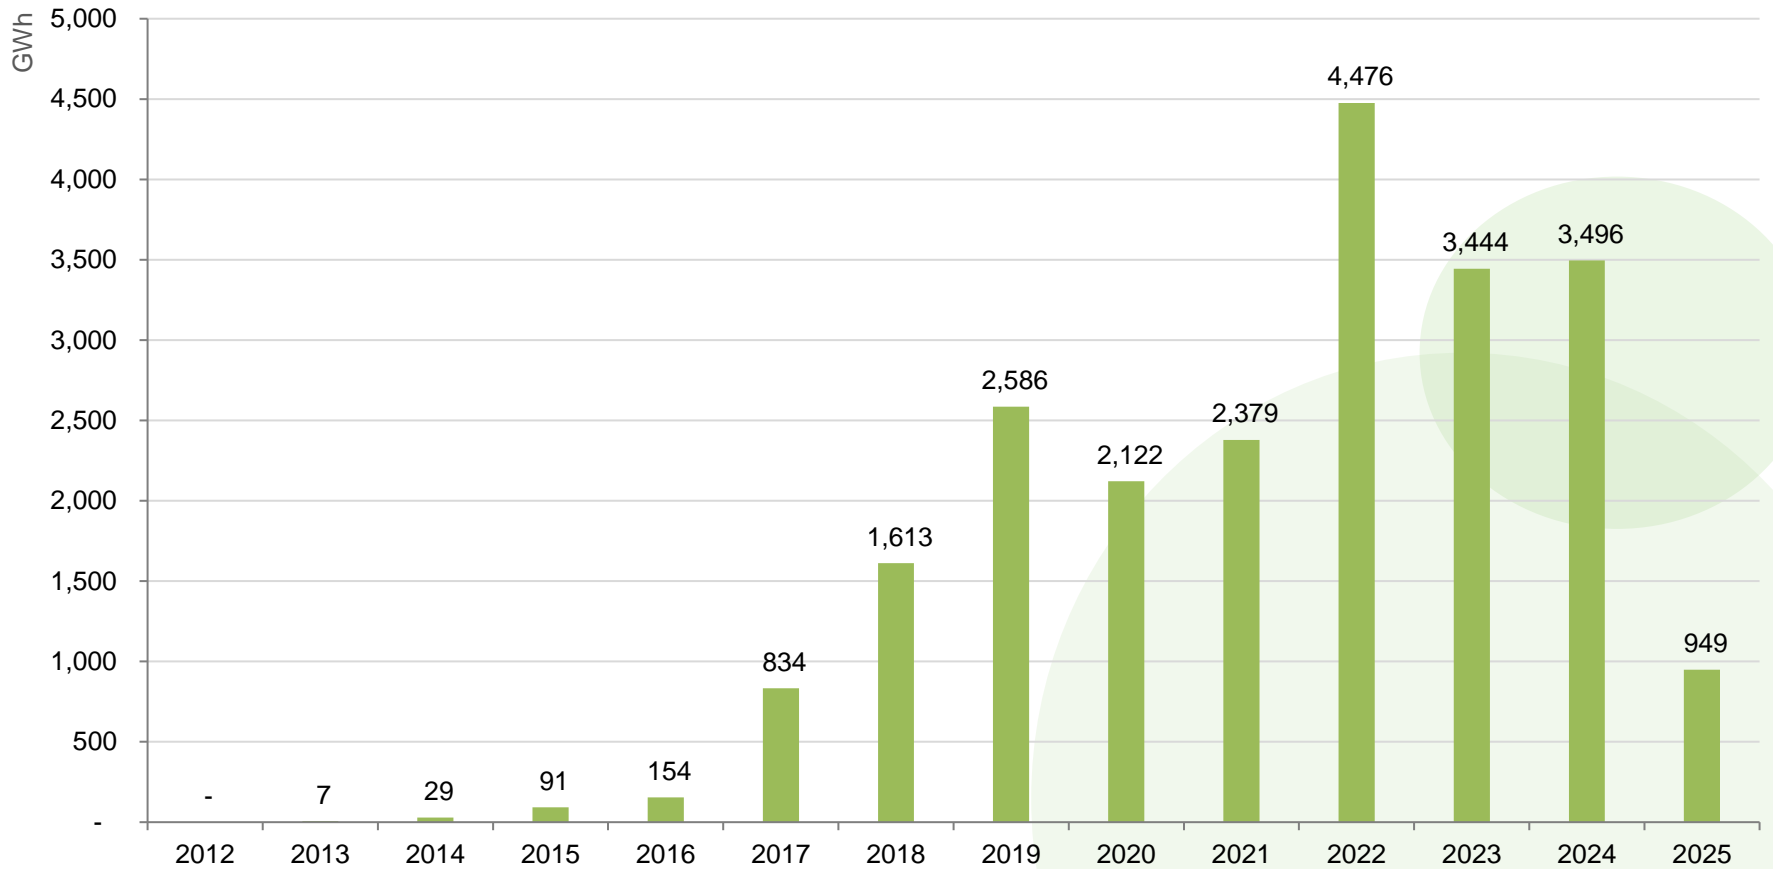

Number of GGCS Trader Accounts

RGGOs Cancelled by Quarter

RGGOs Cancelled by Year

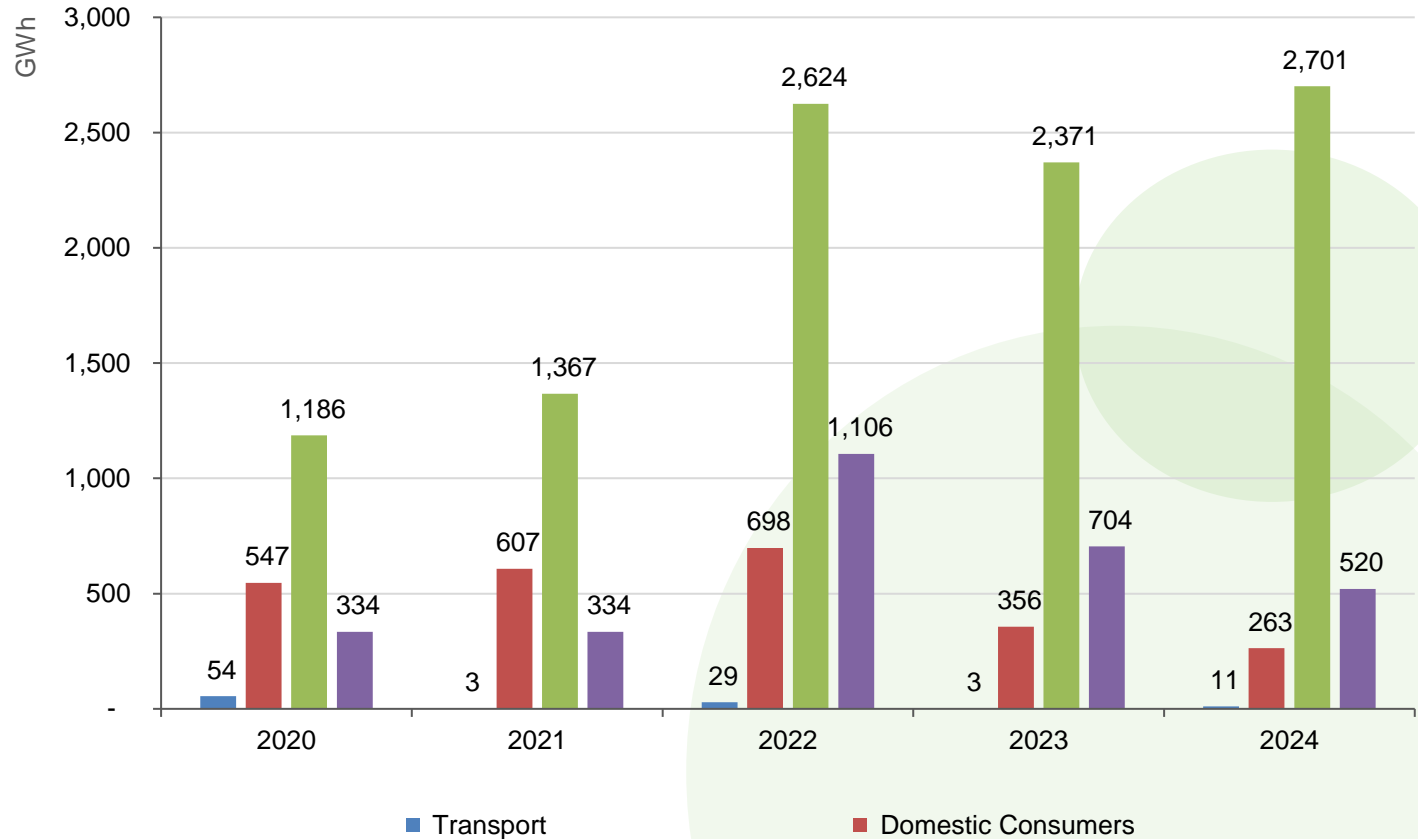

RGGOs Cancelled by Sector

This data series is being discontinued.

The following slide shows transfers vs cancellations in different consumption locations for 2025.

We will provide a breakdown of UK consumption types annually.

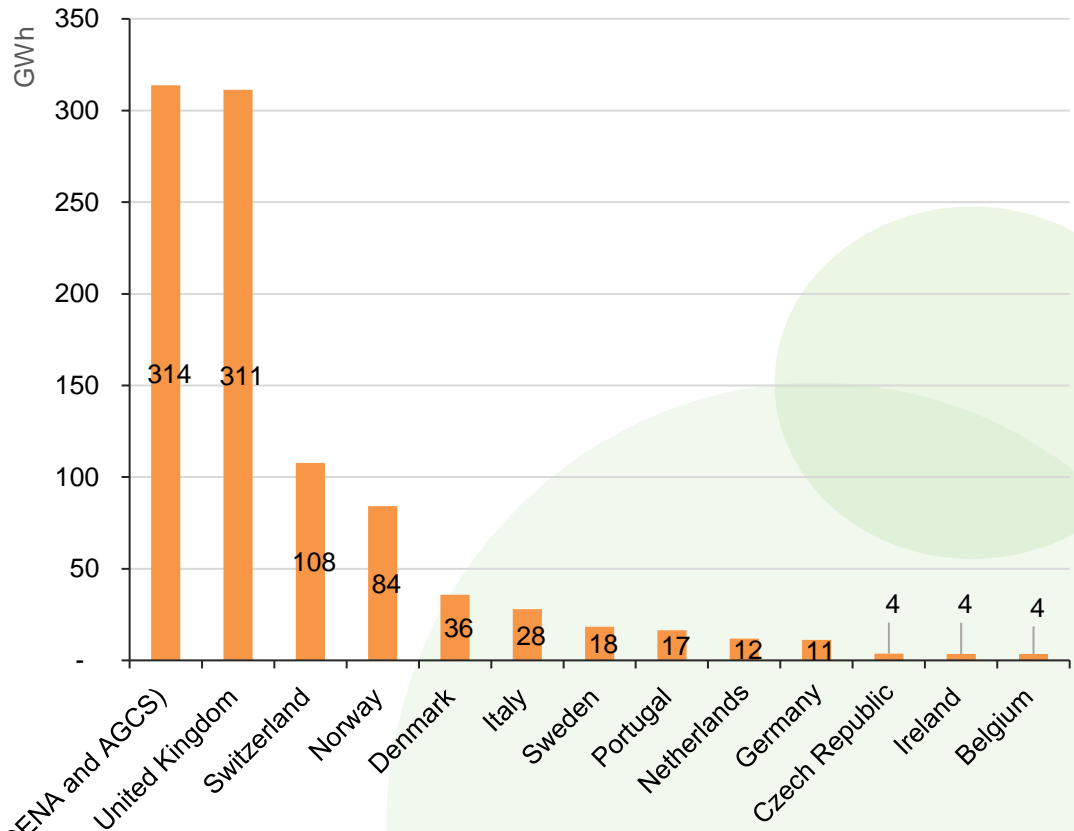

RGGOs transferred vs cancelled by country of consumption (during Q1 2025)

As of August 2024 all RGGOs cancellations must record a country of consumption.

GWh recorded as cancelled outside the UK have been cancelled "ex-domain" i.e. directly from a GGCS account without transfer to another registry, towards gas consumption in the country named.

Where RGGOs are transferred to another registry then that registry may or may not be cancelled for consumption in that country. We understand both AGCS and DENA allow ex-domain cancellation.

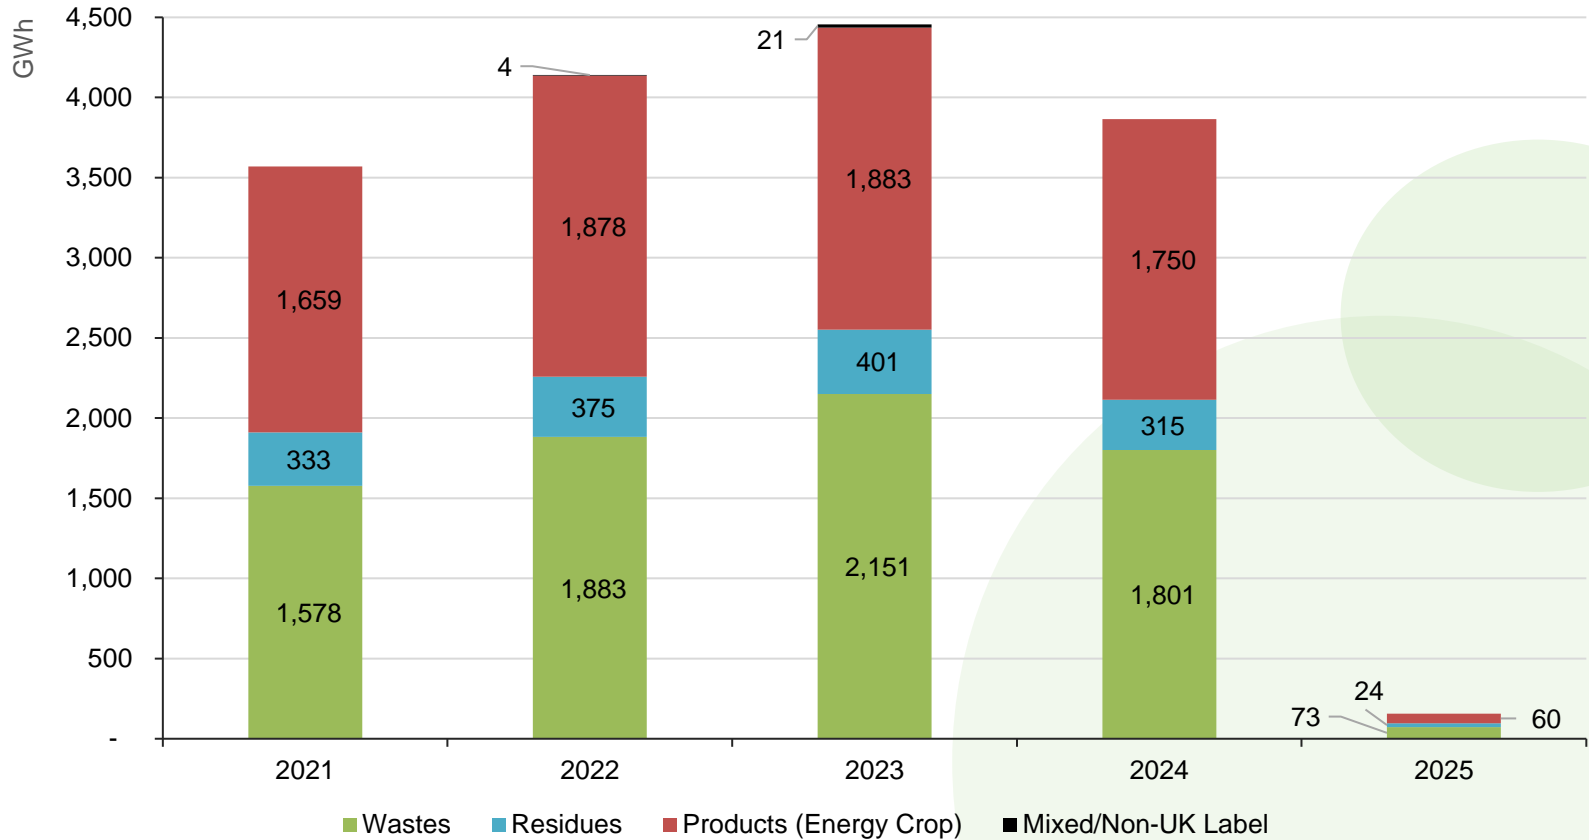

At the end of the year we will provide a breakdown of UK consumption into domestic, non-domestic and transport uses.

Transfers to Other Registries (DENA and AGCS)

RGGOs Issued by Production Year and Energy Source Label

RGGO Status by Vintage (production year)
